

Dear Donators,

My name is Azari Bufford and I was one of the many people who were blessed by your support of the JSSCC. Words cannot describe how thankful I am for your donations to the trip to China. The trip was one of the best experiences I've ever had. The amount of gratitude I have for you is very high. During the trip, I was able to sight-see various places, try new foods, meet new people, and build long lasting friendships with the people that I would have never met without your considerations. My favorite part of the trip was being able to meet new people in the school's that we visited and also being able to experience first-hand Chinese culture. It was great to be able to connect with students my age and to be able to experience a day in their lives. Visiting schools and communicating with people around my age really opened up my eyes to how society operates outside of America. I also got to visit many memorable places in Chinese history that showed perspective on how China appreciates and continues to display their culture. Your support means the world to me and everyone else who went on the trip and plays an important role in furthering the mission of establishing friendship between China and the U.S. Because of your generosity, I can now bring all that I have learned and use it the better the Chinese community in my school and more. Once again, thank you for your support and donation. As little as it may seem, you are changing the world for better communications and love.

With Love,  
Azari Bufford
